The Culligan® Advantage

- Installation and support from a trusted dealer network
- Proven, 85-year commitment to quality
- Local water quality expertise
- No. 1 provider of eco-friendly, sustainable water filtration solutions
- 8.5 million offices and homes rely on Culligan drinking water

Multi-Stage Purification Process

1 Sediment Filter

Reduces large contaminants or particles.

2 Pre-Carbon Filter

Can remove particles as small as 10 microns.

3 Dual Reverse Osmosis (RO) Membrane

Reduces contaminants such as lead, arsenic, chromium, copper and other metals.

4 Mineral Carbon Filter

Polishes the water for great taste and also adds minerals to the filtered water.

Culligan Water

Culligan Peak™ Combination Ice Maker and Water Dispensers are certified by independent, authorized 3rd party laboratories in accordance with industry standards. For more information on certifications and claims, please see the product data sheet.
