

Culligan Water®

**Cleaner, smarter water.
Every drop, every day.**

Aquasential™ High Efficiency Iron-Clear® Water Filters

For high-efficiency water filtration, nothing can match the intelligent design of the Aquasential™ High Efficiency (HE) Iron-Cleer® Water Filter.

Problem water takes on many different aspects: The bad odor and unsightly black stains in your bathroom due to hydrogen sulfide or the ugly rust stains on your clothes, dishes or fixtures caused by iron in your water. All different.

Culligan has effective solutions to these and other water problems you may have. All Culligan filters are customized to handle your specific type of problem water.

With a new, modern color, the Aquasential HE Iron-Cleer Filters give you cleaner, safer water and more peace of mind.

Better Water Means Better Living.

Tough on rust stains

If there’s iron in your water, you don’t need us to tell you how bad a problem it is. Ugly rust stains on your clothes, fixtures and dishes remind you everyday. Culligan’s Aquasential HE Iron-Cleer Filter takes care of that. Through an exclusive filtering process, iron is oxidized and then filtered, leaving you with fresh, clean water for bathing, cleaning, and washing.

Stops that rotten egg odor

Hydrogen sulfide. If you have it, you know it. It’s what causes that "rotten egg" odor in your water. And it doesn’t look any better than it smells. Hydrogen sulfide leaves black stains on your laundry and bathroom fixtures. Even worse, it can cause serious damage to your pipes, leading to costly plumbing repairs. Culligan’s Aquasential HE Iron-Cleer Filter reduces these problems using a filtration process that removes hydrogen sulfide from your water. So you won’t have to hold your nose every time you turn on the tap.

Hey Culligan!

At Culligan, we’ve been committed to providing superior water treatment products for over 85 years. Our units offer state-of-the-art electronic controls, innovative valve design, and are tested to the highest standard. And they’re supported by your local Culligan Water® dealer, a water expert that can also provide salt delivery, filter and media changes, rentals and financing options.

A Culligan® Aquasential™ HE Iron-Cleer® Water Filters give you:

BRIGHTER LAUNDRY

CLEAR DRINKING WATER

NO ODOR

REDUCES STAINING

SYSTEM BENEFITS

- Reduces rotten egg smell.
- Prevents rust stains and/or black spots on laundry and fixtures.
- Prevents pipe damage from deposit build up.

Product Specifications

Patented Smart Technology

- The air compressor is key to the aeration process which oxidizes the dissolved iron and hydrogen sulfide.
- On/off times adjustable to raw water characteristics.
- Automatic bypass valve provides the convenience of bypassing the water softener from the softener.
- Exclusive Culligan Soft-Minder® meter monitors daily water use and provides advanced system diagnostics.
- The easy-to-read back-lit display lets you know your softener is working and warns of system malfunctions.
- Optional Leak Sensor provides peace of mind if there is a water/moisture issue.

Unique Media Filter

- The media in the filter tank acts as an insoluble catalyst to enhance the reaction between the oxygen, iron and hydrogen sulfide.

Chemical-Free

- Requires no chemicals for operation or reconditioning. Oxygen from the compressor is used to naturally clean your water.

Two-Tank System

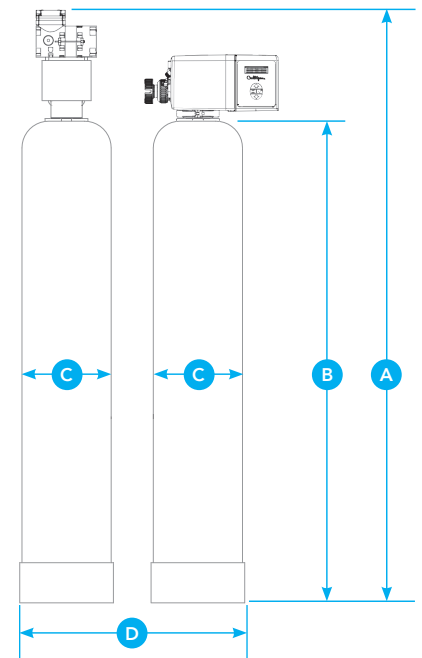

- Water is forced through the aeration tank (1st tank) which converts dissolved minerals such as iron manganese and sulfur into particulates. The particulates are then filtered through the multi-media tank (2nd tank).

Exclusive Reliable Design

- Mechanical improvements including design updates and indicator lights to make sure it's always in peak condition.
- Exclusive, non-corrosive valve using motorized pistons that provide more reliability than rotary valve systems.
- Sturdy media tank with filament-wound exterior, and smooth, non-permeable inner tank shell.
